

## 1. Project Title and Authors

Team No. 52

Carlos Subramanian Vidal ([cksubram@usc.edu](mailto:cksubram@usc.edu)),

Christian Addei ([caddei@usc.edu](mailto:caddei@usc.edu)),

Henry Sazo ([hsazo@usc.edu](mailto:hsazo@usc.edu))

## 2. Preface

- a. The current document is version 1.1. In terms of changes, there haven't been many other than grammar changes in our wording and clarifying any confusing details a reader may encounter when reading the document. Ultimately, what this document contains is the details of the bug fixes, feature additions, and meeting information of our team's sprint over the last few weeks.

## 3. The Sprint Plan

a. Product Backlog: We were able to get all user stories from our documents to work on our application. All main features were implemented and working as intended. We added a few features of our own. They are as follows

- Checker for password, age, and native speaker updates
- Visual confirmation of current saved data in a profile
- Error messages when users enter something incorrectly
- Separation of friends and suggestions in the friends page

b. Sprint Backlog: By the end of the sprint we have resolved all bugs that were found during development and testing. Ultimately, our app is far from finished so we suspect that upon further usage more features and bugs will be added and fixed. To elaborate what the team worked on during the sprint:

- Added more user-friendly features such as adding back buttons
- A cleaner UI system
- Navigation cleanliness

## 4. Daily Scrums (you should have at least 5 of these documented meetings)

1

a. Participants: Christian Addei, Henry Sazo, Carlos Subramanian Vidal

b. November 26, 2023, 20:00-20:15

c. Zoom

d. All team members discussed making progress on their assigned feature (Christian on replacing passwords with stars, Henry with designing the back buttons, and Carlos with pre-populating the update profile fields) and saw no setbacks to their work. All team members discussed that their next objective would be to continue implementing their assigned tasks.

2

a. Participants: Christian Addei, Henry Sazo, Carlos Subramanian Vidal

b. November 27, 2023, 20:00-20:15

c. Zoom

d. All members began working on their feature implementations and minor bug fixes. Carlos began implementing the pre-populating of the update profile fields but said would need another day. Christian read up on documentation to implement the hiding of a password entry when signing up. Henry presented potential design updates in order to incorporate the buttons without overloading the UI

3

a. Participants: Christian Addei, Henry Sazo, Carlos Subramanian Vidal

b. November 28, 2023, 20:00-20:15

c. Zoom

d. Carlos found some bugs that led to crashes when implementing the separation of friends and suggestions so needed more time. Christian was able to successfully implement the hiding password feature. Henry updated the current UI and added the buttons to make it easier for users to navigate the app.

4

a. Participants: Christian Addei, Henry Sazo, Carlos Subramanian Vidal

b. November 29, 2023, 20:00-20:45

c. Zoom

d. Everyone worked on helping Carlos fix the bugs that were found during his implementation of the friends tab. By the end of the meeting, we figured out the issue and had the functionality of this feature working smoothly without crashes.

5

a. Participants: Christian Addei, Henry Sazo, Carlos Subramanian Vidal

b. November 30, 2023, 20:00-20:10

c. Zoom

d. All members ran the application on their local computers to make sure all features were working properly and without issue. Upon checking all main features and newly added features we added comments to our program to make it clean and readable.

## 5. Sprint Review

a. The team must hold a review meeting at the end, to identify the planned work that was completed during the sprint, as well as the planned work that was not completed. The team must reflect on the sprint and identify “process improvement” actions

b. Must document the following information

i. Dec 1, 2023 , 19:30, Attendees: Christian Addei , Henry Sazo , Carlos Subramanian Vidal

ii. Meeting Summary

1. Return to home buttons implemented, passwords now appear as stars instead of plaintext, update profile now has the fields pre-populated with the user's data, friends and suggested friends are now separate lists in the friends page

2. Everything was delivered, this is because we were aware of our limitations and decided to take on work in small achievable chunks, and as a result, we were able to complete all assigned tasks.

3. What went well was that our group members were diligent and were able to get work done on time.

4. Due to time constraints and a busy schedule for all team members some optional additional features suggested by the TA were not implemented, these optional features could have been implemented.
